NOTES AND CALCULATIONS: ((sq ft exposure) x 1.05 = number of boards)

## FINISHING HARDIPLANK:

## Patching:

Dents, chips and cracks can be filled with a cementitious patching compound.

## Caulking:

A high quality, paintable caulk is recommended. For best results use caulks that comply with either ASTM C 834 or ASTM C 920. Caulking should be applied in accordance with caulking manufacturers written instructions. (Leave 1/8" gap at trim for caulk. Caulking at butt joints is optional.)

## Painting:

James Hardie products must be painted. For best results install Hardiplank siding with our exclusive Prime Plus® factory priming system and a 100% acrylic topcoat (s). \* If our Prime Plus® factory priming is not being used, Hardie recommends the application of an alkali-resistant primer along with 100% acrylic topcoat (s).

(For paint manufacturers paint specifications, refer to JH Technical Bulletin No. S-100.)

\*Note: Please refer to paint manufacturers specifications for application rates.

APPROVALS: HARDIPLANK lap siding is recognized as an exterior wall cladding in National Evaluation Report No. NER405 (BOCA, ICBO, SBC); City of Los Angeles, Research Report No. 24862; Dade County, Florida, Acceptance No. 99-0223.07, US Dept. of HUD Materials Release 1263a, California DSA PS-019 and City of New York MEA 223-93-M. These documents should also be consulted for additional information concerning the suitability of this product for specific applications.
